

Eastern Bering Sea walleye pollock stock assessment

May 2025, CIE review

Jim Ianelli and Carey McGilliard

2025-04-01 00:00

NULL

Executive Summary

The work presented below was based on the same data sets used in the 2024 assessment. The first task was to update the model runs to include the 2023 data. The model runs were updated and the results are presented below. The model runs were then used to compare the FT-NIR data with the traditional data sources (BTS and ATS). The results of these comparisons are presented below. The model fits to the data are presented in the tables at the end of the document.
