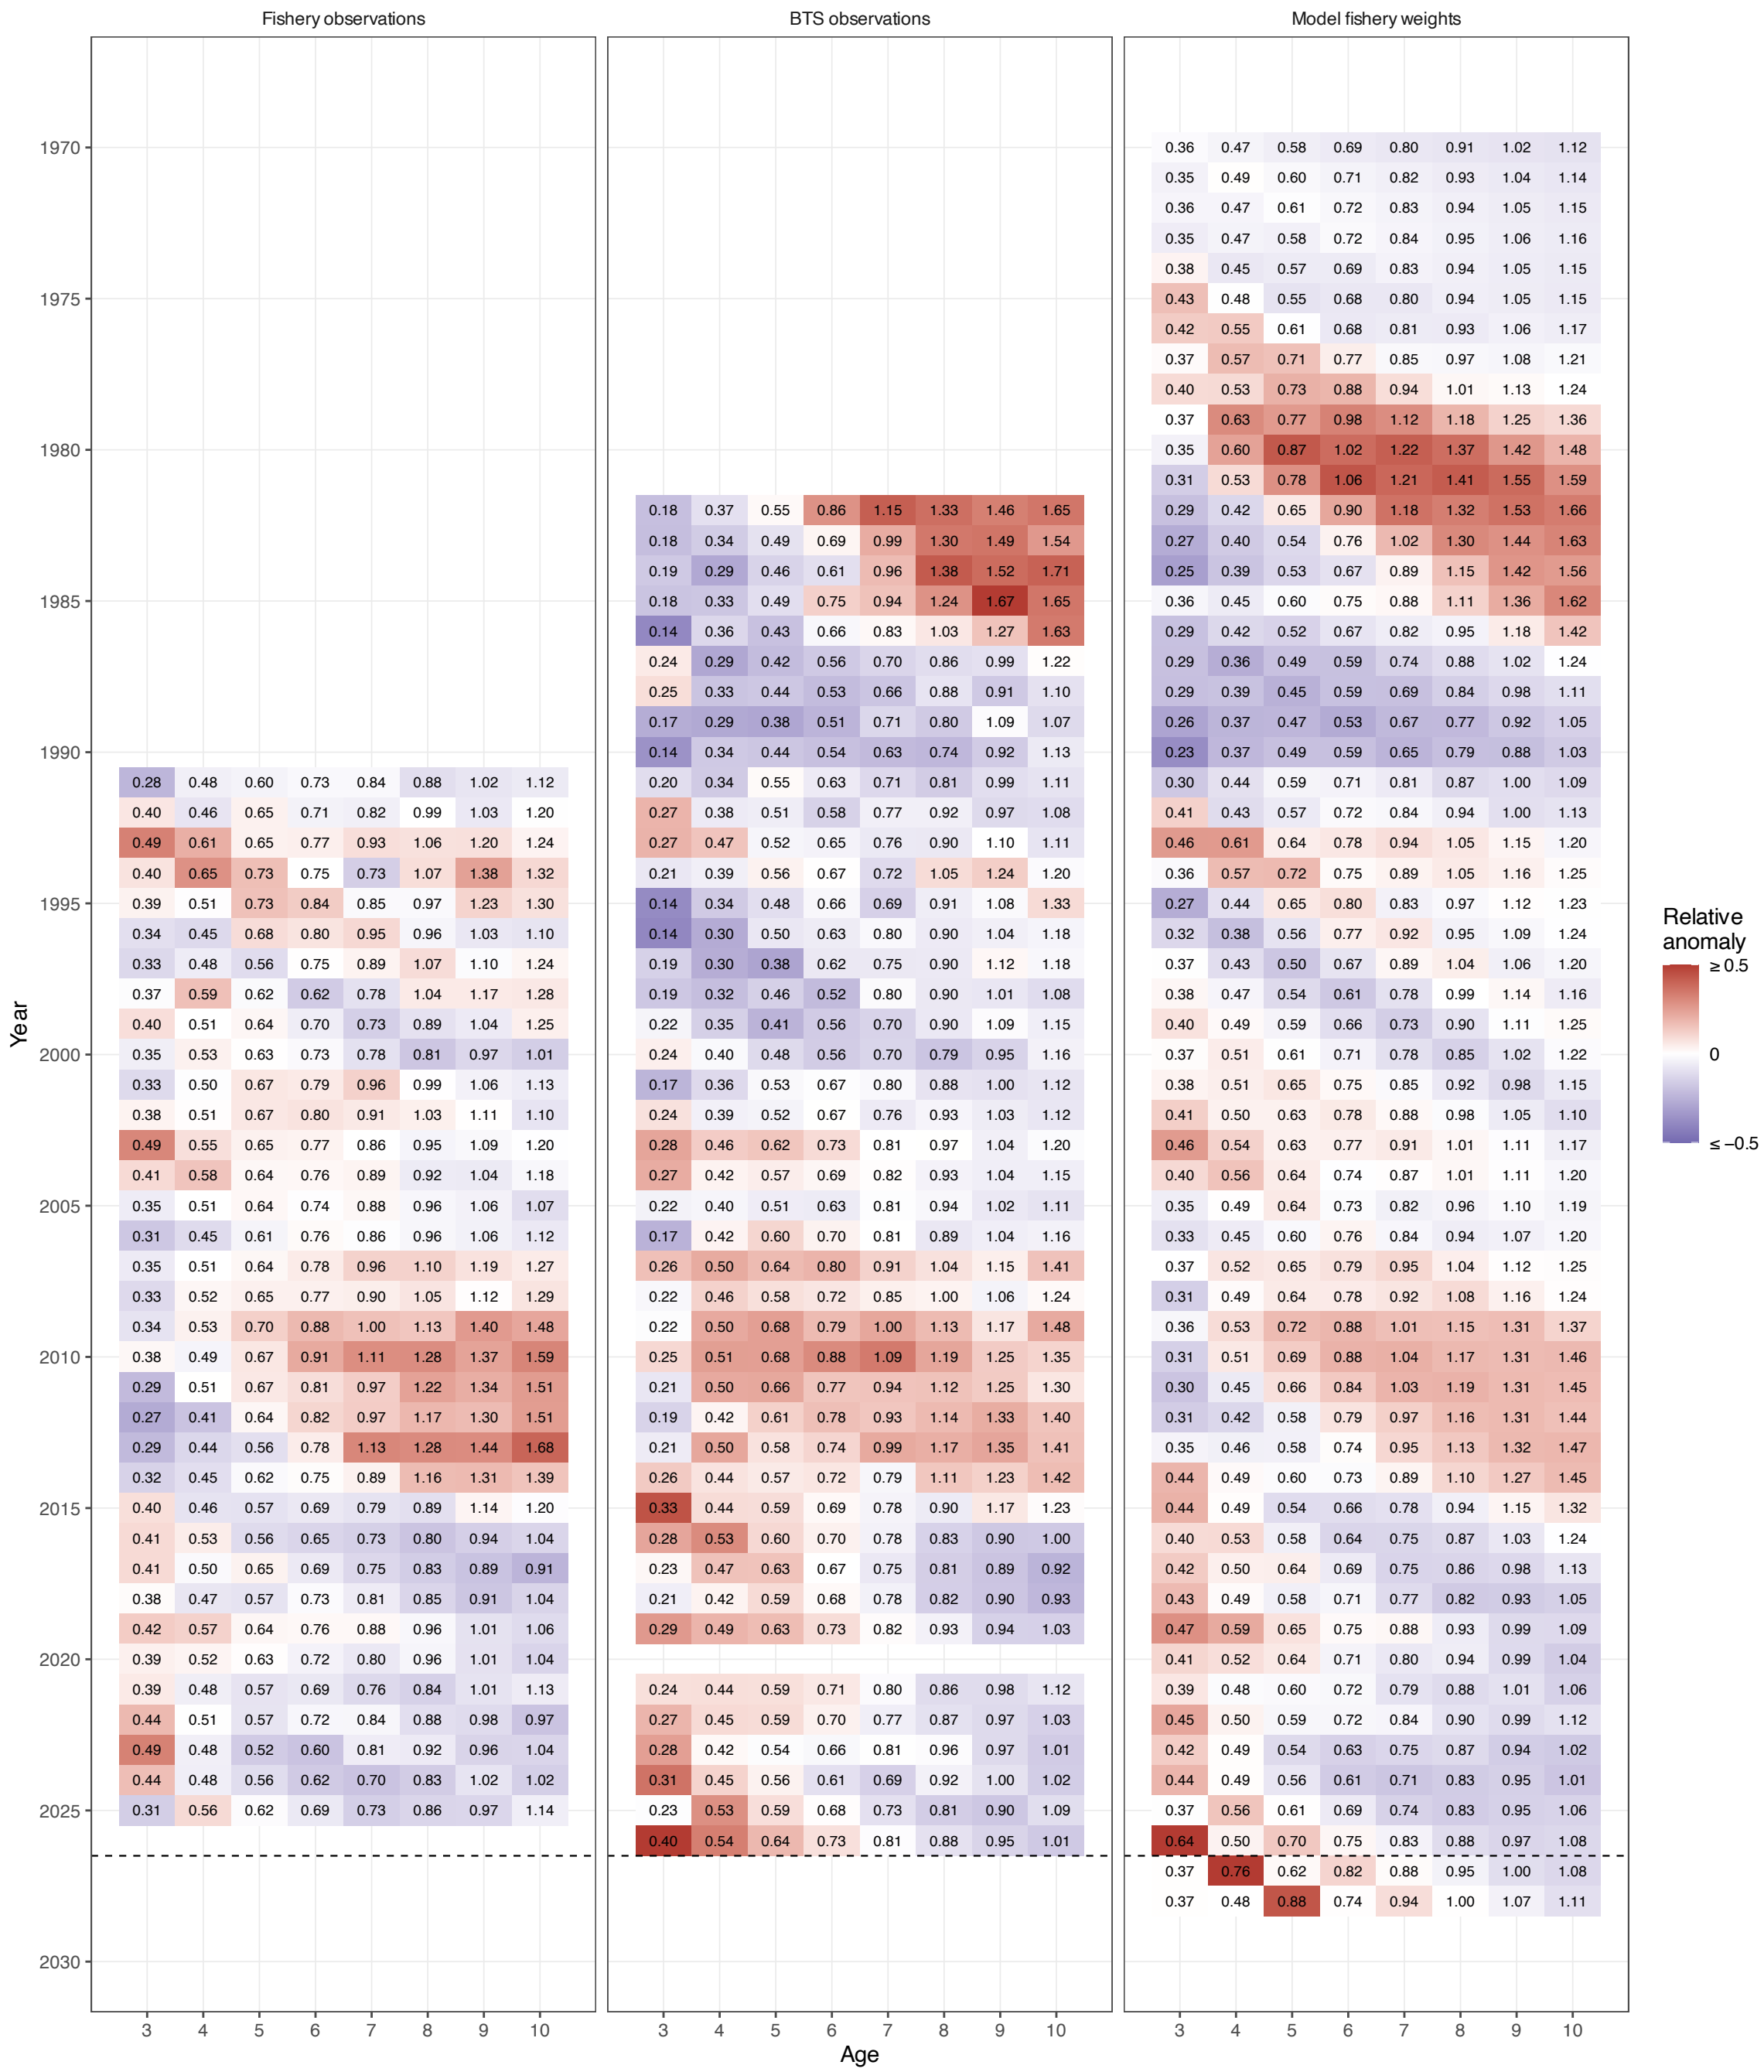
Weight-at-age: observations and model estimates through 2028

Cell labels: kg per fish. Dashed line separates 2027–2028 predictions from years through 2026.



Saved WtAgeRE joint fit: ebs_fishery2026_pool9_12_cv100_20261022 / attempt-001.
Fishery observations end in 2025; BTS observations end in 2026. Model fishery weights include estimates without observations.
Anomalies are relative to each panel's age-specific mean through 2026; colors saturate at ±50%. Ages 3–10 shown.
